Congratulations on winning the Mountain View Fund Award 2021!

Dear Ladies and Gentlemen,

After a challenging year with the outbreak of the Corona Pandemic, the entire Mountain-View Data GmbH Team is even more delighted to honor you for the excellent performance of your fund:

Commodity Capital Global Mining Fund

The fund has been awarded on evaluation of a database including more than 45,000 investment funds for

1st Place 2021

in the following category:

Equity Funds Sector Precious Metals

The Mountain View Fund Award recognized funds that have consistently delivered strong risk-adjusted performance compared to their peers. Mountain View awards its prizes on basis of both quantitative and qualitative criteria using a proprietary MVD-Score Rating, which is a risk-adjusted performance measure calculated over 12, 36 and 60 months.

In addition, we decided to include climate-friendly investment strategies as part of the Mountain View Fund Award evaluation criteria. For this reason, all winning funds have been subjected to sustainability tests by our Finance & Research expert team regarding various ESG criteria. Our goal is to set an example to show that sustainable investments not only contribute to the preservation of our planet, but are also rewarded in the financial market. Based on these fact-orientated assessment criteria, the amount of competing funds in our database and the remarkable achievements of your fund management, **Tobias Tretter**, we are pleased to award your team with the Mountain View Fund Award and certificate. The award is given to the best funds in its category that meet the special focus on sustainability and climate friendliness developed by Mountain View.

For further information regarding the marketing rights and how you can use the Mountain View Fund Award for publicity purposes, please contact office@mountain-view.com.

Greetings from Diex,

CEO – MMag. Wolfgang Matzner
